URBAN-ADVENTURES[®] Net Course

100% Net Elevated Acrobatic Courses

The newest arrival of the Urban-Adventures family, the NetCourse, or Collective Protective Equipment (CPE) course requires no harness or carabiner. This is thanks to the protective nets placed under and around the artificial structure, a different set-up from the artificial elevated acrobatic course with a continuous lifeline. The nets make this structure 100% secure, all while limiting the need for personnel to supervise.

Starting at age 4, adventurers can freely access this structure and enjoy in total autonomy without equipment. The platforms rise as high as seven meters.

Urban-Adventures Net Course offers 30 different and interchangeable stations, inspired by the elevated acrobatic courses. Designed with openness in mind, it is well integrated in its environment – both indoors and outdoors.

Technical Characteristics

Stand-alone or attached, starting with six stations, 3 ½ meters high.

Wooden (pine) structure, pressure-sealed treatment and galvanized steel, designed and validated (calculation notes) by our research center.

Certified by CERES.

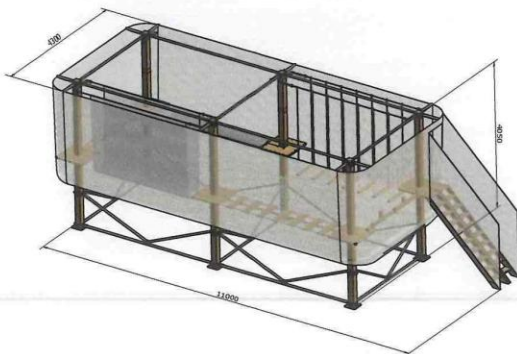

Capacity: 18 people at once, 100 people / hour for the six-station version.

Manufacturing and material: 100% French.

Implementations

Mainly destined for sale to complete an offer of leisure, Urban-Adventures NetCourse is addressed to:

- Indoor playgrounds or indoor leisure complexes
- Outdoor areas, whether for pleasure, attraction or cultural
- Vacation Villages, motels
- Leisure centers
- Mountain stations.
